

PEKING WAR OFFICE DIGS FOR TREASURE

Has Forty Coolies Delving in
General Staff Courtyard
for Silver Bullion.

FIND RARE POTTERY

Refused Privilege of Hunt to
Servant of Martyred Owner
of Fortune.

PEKING, April 8.—Forty coolies, working for many days, have unearthed several valuable pieces of ancient pottery in the courtyards of the general staff here, but so far their search for a buried treasure of silver bullion has failed. The courtyards of the general staff headquarters look somewhat like the shell-torn fields of France and Flanders, and the ghost of Yang Hsien-shan, martyred for his country by the old Empress Dowager, must smile ironically for he, and he alone, knows where the treasure is buried—if it is there at all.

The general staff of the Chinese army was pursuing its usual peaceful

To Use Wireless Phone in Automobile Contest

[By Associated Press.]
INDIANAPOLIS, IND., April 8.—A wireless telephone will be used by one driver in the 500-mile automobile race at the Indianapolis Motor Speedway May 30, to keep in touch with his pit during the long grind it was announced here today. The car was designed and entered in the race by Louis and Arthur Chevrolet, of this city. Louis Chevrolet designed and built the winning cars in the 1920 and 1921 races.

Pointing out that drivers and mechanics lose track of their standing in the long race after they have gone several laps, the Chevrolet brothers declared the wireless telephone will enable the automobile pilot to keep in constant touch with his pit and know at all times his place and other valuable information.

Jack Currier, of Greenville, Ohio, who has been selected to drive the car, is in the city working on it. To make the use of the wireless possible a small device will be placed on the rear of the car to catch the waves as the machine speeds around the track.

daily occupation of "squeeze" until an old servant around headquarters insisted that a vast treasure lay under the earth of the courtyards. He requested permission to dig for

the silver, which is believed to be about a million dollars, saying he would bear all expenses, he responsible for any damage done to the buildings and gladly receive a heavy penalty if the treasure were not found. He promised one-third of what he might find to the general staff. But the general staff thought differently. If it had a treasure in its own back yard, why not put its own coolies to work and keep the whole of the million?

It did. That is, it did put its own coolies to work. As yet not an ounce of silver has been found, and there is now very little space left in which to dig.

The land on which the general staff now has its headquarters was the home of Yang Hsien-shan, one of the few Chinese who had the courage to memorialize the old Empress Dowager at the time of the Boxer rising while the fury-mad Boxers stormed the legation quarter in Peking. Yang sent in his memorial, condemning her Majesty, the Old Buddha, for permitting the anti-foreign warfare, which he insisted, would redound to the detriment and discredit of China. The next morning his head was removed, but before then, according to the old servant of the general staff, Yang hurriedly buried a treasure of about a million dollars in his courtyard, which is now one of the courtyards of the Chinese general staff.

BUSINESS IMPROVING, SAYS MOTOR CAR HEAD

Any man who wants to find out whether business is coming back can take a tip from Edward S. Jordan, president of the Jordan Motor Car Company.

He made up his mind that one man's judgment of the situation did not count for much. He decided to interview 100 men in different lines of business, taking them as they came. He asked one question of the banker, the butcher, the baker, the tailor, the grocer, the steel manufacturer, the railroad conductor and scores of others. Here is the question:

"Is business getting better?"

He began on March 15. Within two weeks he had asked the question of 100 people in different lines of business. The invariable answer proved that business is getting better.

July 1, according to Jordan, will see the permanent turn in all lines of business.

Russia Money Mad.
MOSCOW, April 8.—Russia is money mad. Almost everybody, from the humblest Communist to the erstwhile aristocrat, is thinking, dreaming, talking of money. Public events,

life, death, all else go by the board. As the ruble drops dizzily week by week, people cease to talk or do business in millions, as a few months ago. Now every one of money consequence is not a millionaire, but a billionaire, and soon they will be trillionaires. A million rubles lately has been equivalent to \$2, a billion to \$2,000.

Speculation has reached such pitch that the cabman speculates on his fare. To one he charges 20,000 rubles for a ride and to another 100,000 or 200,000, according to his wit.

NEW JEWETT CAR IS ON EXHIBITION HERE

The Jewett, the new light six designed and manufactured by the Paige-Detroit Motor Car Company, is on exhibition in the local Paige salesrooms, Frontis Motor Company, 210 West Broad Street. An allotment is on the way and motorists will soon have an opportunity, not only to examine the car, but also ride in it, so that they may determine just what Paige engineers have worked out in the way of a six-cylinder automobile in the \$1,000 class.

The Jewett has long been expected for it was long in the making, being the fruit of a number of years of

study and experiment. It is described as an effort to give the market its first quality six at a quantity price. Undoubtedly many motorists will want to size up this effort and orders and demonstrations are already being booked.

"C. W." IS PRINCIPLE OF RADIO TELEPHONE

The major portion of present-day radio success is due to a form of transmission known as the Continuous Wave, which has remarkable carrying powers, selectivity, simplicity and low cost as compared with the old form of spark transmission. This fact was picturesquely demonstrated a short time ago when amateurs transmitted messages across the Atlantic on the small power of fifty watts—just sufficient to light the ordinary electric bulb in your home.

The continuous series of oscillations generated by the vacuum tube is propagated over space with a perfection of form and power that makes the superimposition of a speech wave upon it ideal for voice transmission. This bulb is nothing more than an ordinary electric bulb with two additional pieces of metal: a small spiral surrounding the glowing filament

and a metal plate. Its operation is simplicity itself.

The huge cumbersome and sparking form of "undamped" transmission required an immense amount of power and attention for its small and inefficient output. The waves which it generated were not "sharp," but distorted and varying. C. W. transmission overcame this and made broadcasting and other forms of voice transmission possible.

WIRELESS DIRECTION FINDER PICKS UP SHIPS

LONDON, April 1.—Practicability of the wireless direction finder has been amply demonstrated in two recent rescues at sea, in which the position of the ship in distress was not correctly reported in its S. O. S. calls.

The Mod, which was severely damaged in the recent North Atlantic storm, was a notable instance. The British vessel Melmore Head picked up the Mod's S. O. S. call and proceeded immediately for the position given. The captain of the Melmore Head failed to find the Norwegian steamer at the place indicated, but through the use of his direction finder found the damaged vessel seventy-six miles away from that point. The

Melmore Head arrived just in time to effect a rescue of the twenty-three men of the crew.

Armored Cars in Jerusalem.
JERUSALEM, April 1.—Lord Northcliffe, British newspaper publisher, expressed surprise on his visit here that it was deemed necessary to meet him and escort him through the streets with armored cars. He said it was a source of wonder to him how little the people in England and America knew about the conditions existing in the Holy Land.

New Home for Battery Company.
The building formerly occupied by the Automotive Company at 1205-7 West Broad Street, has been taken over by the Tire and Battery Service Station, where they will maintain a service station for Ray Batteries and Pennsylvania Vacuum Cup Tires.

Some people claim it is impossible to charge a battery in five minutes. When the automobile was invented, people said it would not run. When the airplane was invented people said it would not fly. When the submarine was invented people said it was impossible. Rumor has it that Henry Ford was considered crazy at one time. WE WANT TO GO CRAZY JUST LIKE HENRY DID. USE HYDRO.

Hydro is being used in 22 States at the present time, and before the year is out it will have national distribution and will be distributed from nine different factories over the United States.

A Hydro User Is a Hydro Booster.

HYDRO stations, with HYDRO trained men, are being placed everywhere, and if you can comply with the following requirements we offer you an opportunity to secure the exclusive dealership in your town.

HYDRO MANUFACTURING COMPANY is composed of men whose experience, character and knowledge of battery engineering is of the highest, and we want only good business men and not speculators.

WANTED—Exclusive distributor for the city of Richmond, and I can use fifteen high-class salesmen with cars to work Virginia and West Virginia. Apply to M. M. Wilkinson, 668 Murphy's Hotel, sales manager for this territory.

M. M. WILKINSON, State Distributor

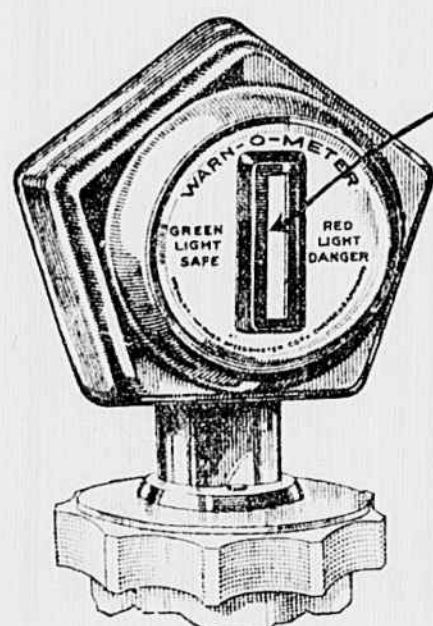

(VIRGINIA AND WEST VIRGINIA)

YOUR BATTERY CHARGED FREE AS DEMONSTRATION.

Warn-O-Meter

The Sign of An Experienced Driver

The Warning Light
Seen Day and Night

THE experienced driver is well acquainted with the disastrous effects of motor overheating, and appreciates the protection this beautiful, electrically operated instrument affords. You can't overlook it. Its brilliant electric signals are always perceptible. It is not necessary to turn a spotlight on it to read it after dark, as it is as easily seen at night as in the day.

The Warn-O-Meter registers motor temperature taken from the motor direct—not from the water in the radiator. It gives you facts.

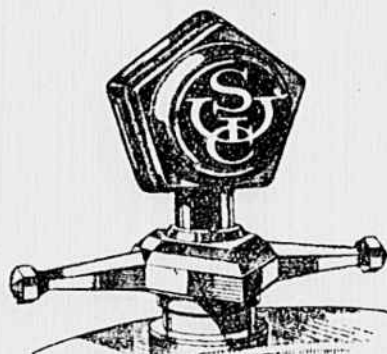

The elegant finish and attractive design of this instrument make it a conspicuously beautiful accessory for your car. In the non-indicating side of the Warn-O-Meter, a special insignia may be substituted for the nameplate, illuminated by the lights within the instrument and attractively displayed day and night. Plates of special design are extra equipment, but may be secured at any Stewart Service Station.

STEWART-WARNER SPEEDOMETER CORP.
CHICAGO, U. S. A.

DE LUXE MODEL, all nickel finish, \$12.50.
STANDARD MODEL, black and nickel finish, \$10.00.
FORD MODEL, similar in finish to the Standard. Furnished with special radiator cap, \$10.00.

When used with the Stewart Pentagon Cap, the Warn-O-Meter is doubly attractive. Riveted on to prevent theft. Top of cap lifts up on a hinge to permit filling the radiator. Price of cap, \$5.00.

Distributors for

VACUUM CUP TIRES — AND — RAY STORAGE BATTERIES

Guaranteed Unconditionally for Two Years.

ANNOUNCES

During its opening week, from April 4th to 11th, they will give to each purchaser of a RAY Battery or Vacuum Cup Tire one Inner Tube free.

VACUUM CUP TIRES, because of their general ability and positive non-skid tread, are known wherever tires are used.

RAY STORAGE BATTERIES, because of their ability to hold up behind a two-year's unconditional guarantee, are fast becoming a leader in the battery world.
